

New York State Fact Sheet on Alcohol-Related Crashes*

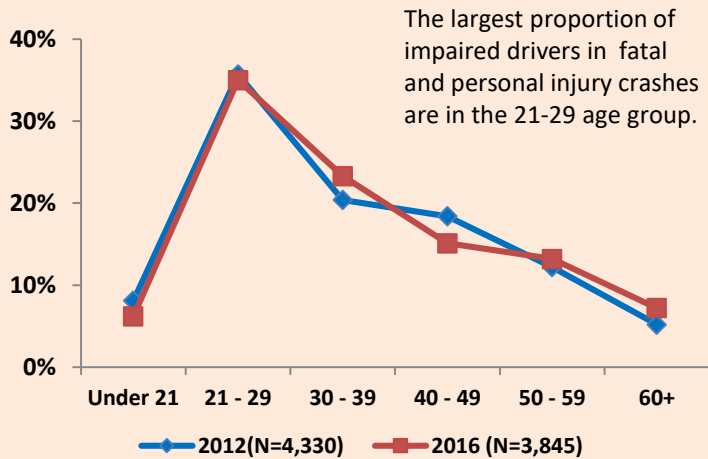

Total and Alcohol-Related (A-R) Fatalities

	2012	2013	2014	2015	2016
Total Fatalities	1,163	1,188	1,026	1,116	1,029
Number of A-R Fatalities	358	387	292	313	272
% of Total Fatalities	31%	33%	28%	28%	26%

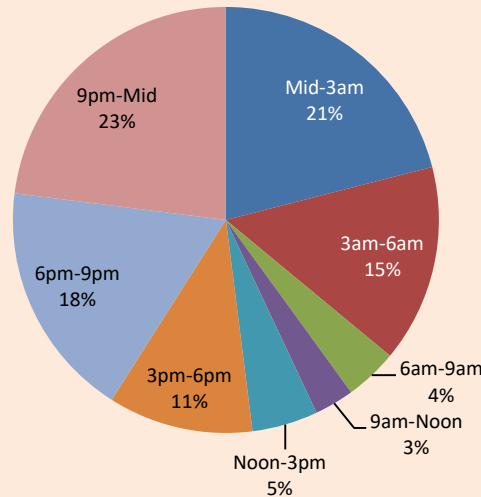

Alcohol-Related Fatal and Personal Injury Crashes Percentage of Alcohol-Impaired Drivers Who Are Female

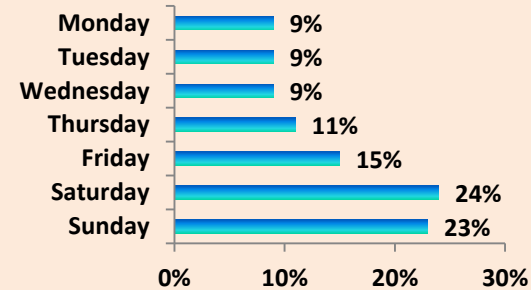

Alcohol-Related Fatal and Personal Injury Crashes Alcohol-Impaired Drivers by Age Group

Alcohol-Related Fatal and Personal Injury Crashes Time of Day: 2016 (N=4,304)

Alcohol-Related Fatal and Personal Injury Crashes Day of Week: 2016 (N=4,323)

Nearly half of alcohol-related fatal and personal injury crashes occur on the weekend.

Note: Fatalities refer to people, while fatal crashes refer to the crash event. One fatal crash (the event) may involve more than one vehicle and more than one fatality.

*Alcohol-Related Crashes are identified based on the presence of a contributing factor for alcohol involvement or a citation for driving while impaired by alcohol or a positive BAC. Includes police-reported crashes only.

Source: All data were obtained from the NYS Department of Motor Vehicles.
