2020

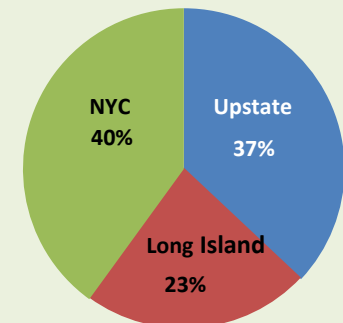

Pedestrians Killed and Injured by Age: 2020

In interpreting these data, any age group with a greater percentage of pedestrians killed or injured than the percent of population indicates that they are over-represented. For example, pedestrians ages 50 and over are over-represented with respect to fatalities.

Pedestrian Fatalities by Region: 2020 (N=241)

Note: Fatalities and injuries refer to people, while crashes refer to the crash event. One crash event may involve more than one vehicle and one fatality and/or injury. All crash-related data were obtained from the NYS Department of Motor Vehicles.

*Police-Reported Only
