

User Guide to New York State Traffic Safety Statistical Repository (TSSR)

The NYS Traffic Safety Statistical Repository (TSSR) was developed by the University at Albany’s Institute for Traffic Safety Management and Research (ITSMR) with funding from the NYS Governor’s Traffic Safety Committee, to provide broader access to New York’s traffic safety data. The TSSR currently contains motor vehicle crash data obtained from the NYS Department of Motor Vehicles (DMV) Accident Information System (AIS) from 2009 forward, including preliminary data for the current year.

Traffic safety ticket data from 2009 forward are also included in the TSSR. The ticket data are captured by two systems maintained by the NYS DMV: Traffic Safety Law Enforcement and Disposition (TSLED) and Administrative Adjudication (AA). Data for impaired driving tickets issued in NYC are captured by a separate system maintained by the NYPD and included in the TSSR.

This guide provides instructions for navigating the TSSR system and interacting with the tables and graphs to view, understand and work with the data.

Access the TSSR

To access the TSSR, go to www.itsmr.org/TSSR. The main page, or **TSSR Report Links**, provides links to two main categories of reports. Click **Crash Reports** or **Ticket Reports** to go to a separate page containing a list of links to the available reports.

Crash Reports

[Ticket Reports](#)

The Accident Information System (AIS) maintained by the NYS Department of Motor Vehicles is the state's primary crash information system. The AIS captures a wide variety of data from the crash reports submitted by police agencies and motorists.

Since the public does not have direct access to the AIS, the GTSC funded ITSMR to design and develop a traffic safety data repository that is publicly accessible via the Internet. As a result, ITSMR built a system known as the Traffic Safety Statistical Repository (TSSR) that captures crash and ticket data. ITSMR has also developed standardized reports and query tools to facilitate access to the data.

DATA SOURCES:

Crash Data: NYS Department of Motor Vehicles Accident Information System (AIS) data snapshot as of **11/15/2019**.

Includes the finalized crash data for 2009-2018 and the preliminary data for 2019. The preliminary data are subject to updates as new or additional information is reported to the DMV following the snapshot date.

Ticket Data: NYS Department of Motor Vehicles Traffic Safety Law Enforcement and Disposition (TSLED) and Administrative Adjudication (AA) systems, and the NYPD ticket system. The data for each system are extracted annually.

Vehicle Miles Traveled: NYS Department of Transportation

Population: U.S. Census Bureau

Licensed Drivers: NYS DMV Driver License File

Motorcycle Registrations: NYS DMV Registration File

< [Data Sources](#) [New Reports](#) >

The user is responsible for the accuracy of all reports, views and opinions based on the use and analysis of the traffic safety data obtained from the TSSR. Authors must represent their work as their own and not that of the NYS Department of Motor Vehicles or the Institute for Traffic Safety Management and Research.

[Crash Data by County and Municipality](#)

The statewide and county crash data provided through the TSSR reflect the crashes that have occurred on New York's roadways. Captured by the NYS Department of Motor Vehicles Accident Information System (AIS), the crash data are obtained from the crash reports submitted to the DMV by police agencies and motorists.

NOTE: Due to recent changes made to the Police Accident Report form with regard to the capture and reporting of property damage crashes, users will see a significant increase in the number of property damage crashes in 2018, compared to previous years.

Select a Report

Crash and ticket reports are organized into two main categories – statewide and individual county crash and ticket summary reports. Click a link to **open the report**.

Statewide Motor Vehicle Crash Summary Reports
[Statewide Crashes](#)
[Motorcycle Crashes](#)
[Pedestrian Crashes](#)
[Bicycle Crashes](#)

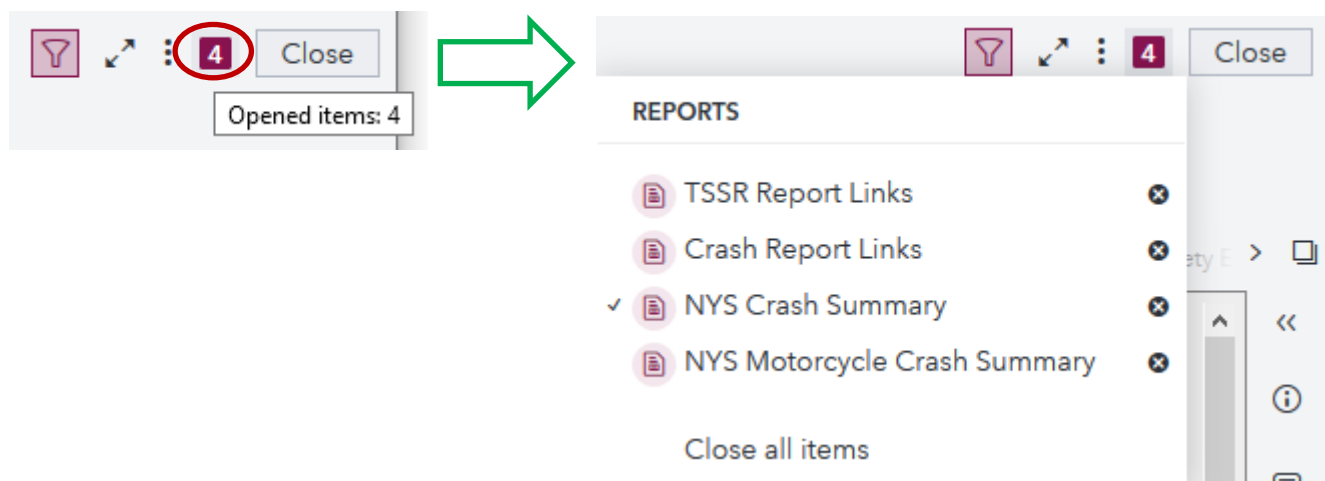

Reports currently available in the TSSR are listed in a separate document, ***TSSR Directory of Reports and Sections***.

Navigate to Reports

The **Navigation Bar** appears at the top of each Report page. Click the **link icon** to return to the previous report.

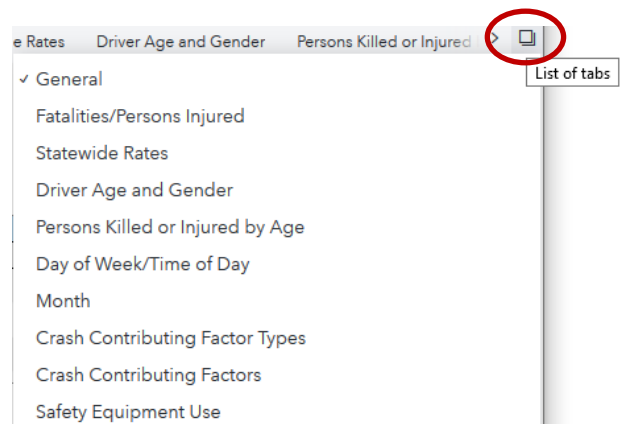

Click the **Opened items icon** on the top right to navigate quickly to **reports currently open**; click **Close**, the **“x”** or **close icon**, or **Close all items** to **close** reports.

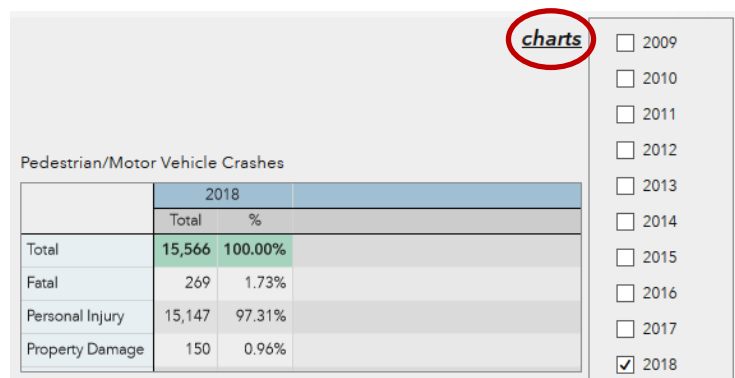

Tip: To save time once reports are opened, use the **Opened items icon**; avoid using your browser's back button. Clicking the browser's back button and then returning to the TSSR requires extra time to re-load reports into memory.

Navigate to Report Sections

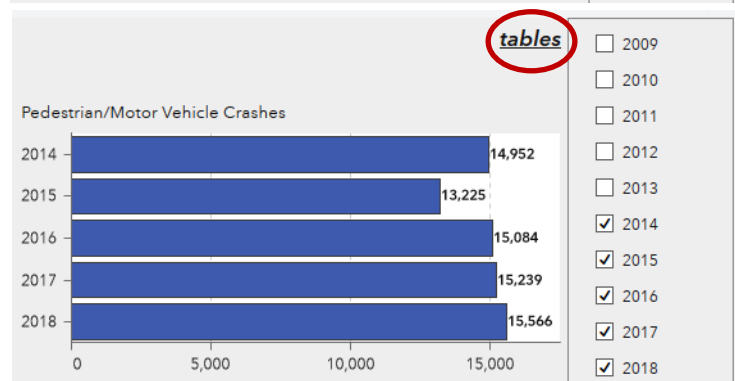

Every crash report and ticket report has multiple **sections**, or **tabs**. Each report opens by default to a section with **General** data displayed in tables. Click a different tab, or click the **List of tabs icon** to choose from a list of available tabs.

For the Statewide crash and ticket reports, click the **charts** link to go to a section containing corresponding charts. Note that tables are available for most report sections. Charts are available for selected report sections.

Click **tables** to return to the corresponding tabular section.

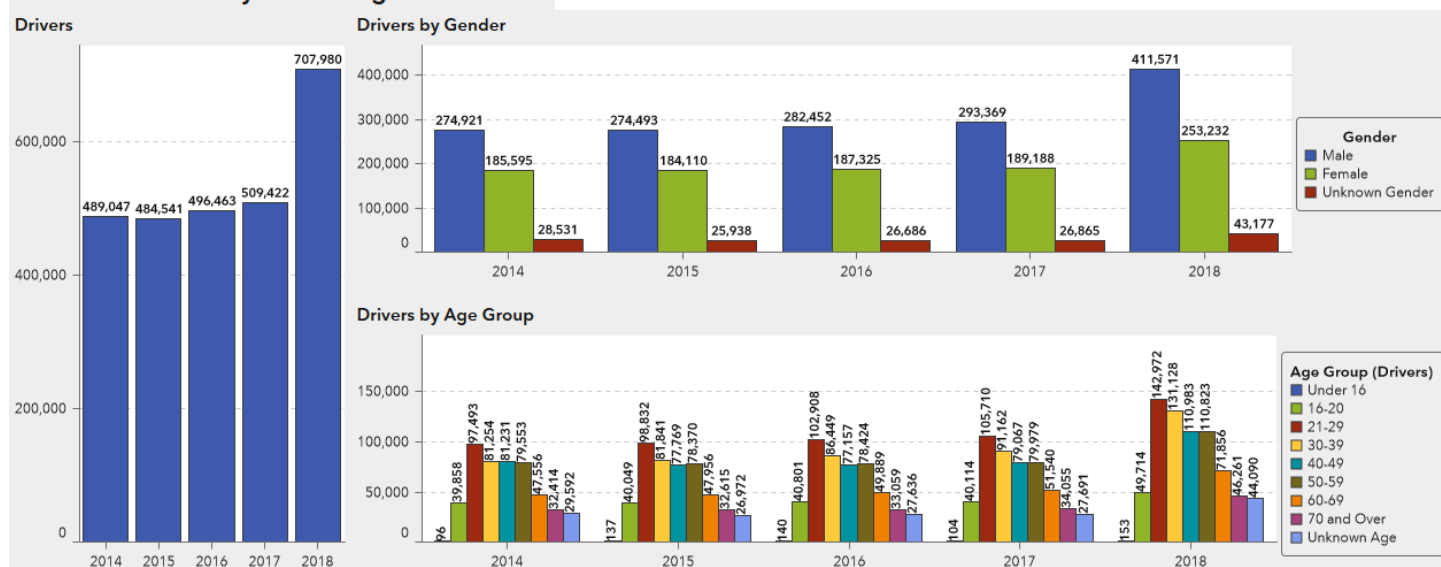

Some sections – for example, **Driver Age and Gender** – contain a single table and multiple corresponding charts.

NYS Crash Summary - Driver Age and Gender

A complete list of current TSSR reports and associated sections can be found in the document entitled **TSSR Directory of Reports and Sections**.

Filter Results for Tables and Graphs

Filter with the Report Type Dropdown

A screenshot of a dropdown menu for 'Report Type'. The menu is open, showing three options: 'All Reportable Crashes' (selected), 'Clear Filter', and 'Police-Reported Crashes'.

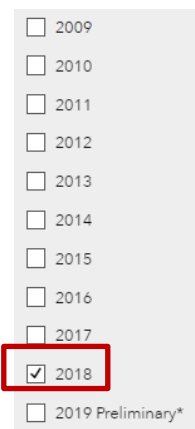

The **Report Type dropdown** list indicates the type of crash report from which the data in the tables or graphs is derived. The default setting for most TSSR crash reports, tables and charts is **All Reportable Crashes**, i.e., crash data received from both police crash reports and motorist crash reports. Select **Police-Reported Crashes** to limit the results to information received from police crash reports. Select **Clear Filter** to see results for all

reportable crashes. Note that some tables and graphs in the TSSR are limited to data from police-reported crashes, e.g., Severity of Crash in the General section; these are labeled **Police-Reported**. Clearing the filter will not affect the results for these tables or graphs. The reports that include only police-reported crash data, e.g., **Alcohol-Related Crash Summaries**, do not have a Report Type dropdown list.

Filter with Checklists

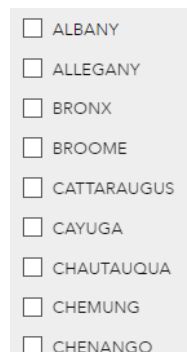

Select one or multiple items in each checklist to **filter the data in tables and graphs**. Leaving every box unchecked in a checklist will return the same results as checking every box.

The default setting for the **Year checklist** in the tabular reports is the most recent final and complete year of data currently available. For the graphical reports, the default setting is the most recent five years of finalized data. Data for years that are not yet finalized are tagged “Preliminary” until the file is complete and the final clean-up has been conducted. Crash data are typically finalized by September of the following year. Exercise caution when using Preliminary data.

A vertical list of checkboxes for years from 2009 to 2019. The 2018 checkbox is checked and highlighted with a red box. The 2019 option is labeled '2019 Preliminary*'.

<input type="checkbox"/>	2009

<input type="checkbox"/>	2011
<input type="checkbox"/>	2012
<input type="checkbox"/>	2013
<input type="checkbox"/>	2014
<input type="checkbox"/>	2015
<input type="checkbox"/>	2016
<input type="checkbox"/>	2017
<input checked="" type="checkbox"/>	2018
<input type="checkbox"/>	2019 Preliminary*

The County Crash and Ticket Summaries include a **County checklist** to show results for any or all of the counties in New York State. The default setting for the tabular reports is all 62 counties.

A vertical list of checkboxes for New York State counties. The list includes Albany, Allegany, Bronx, Broome, Cattaraugus, Cayuga, Chautauqua, Chemung, and Chenango.

<input type="checkbox"/>	ALBANY
<input type="checkbox"/>	ALLEGANY

NYS Crash Summary - Driver Age and Gender by Crash Type

	2018	
	Total	%
Total	707,980	100.00%
Male	411,571	58.13%
Under 16	114	0.02%
16-20	28,489	4.02%
21-29	86,706	12.25%
30-39	81,412	11.50%
40-49	69,481	9.81%
50-59	71,072	10.04%
60-69	46,062	6.51%
70 and Over	27,594	3.90%
Unknown Age	641	0.09%
Female	253,232	35.77%
Under 16	39	0.01%
16-20	21,225	3.00%
21-29	56,266	7.95%
30-39	49,716	7.02%
40-49	41,502	5.86%
50-59	39,751	5.61%
60-69	25,794	3.64%
70 and Over	18,667	2.64%
Unknown Age	272	0.04%
Unknown Gender	43,177	6.10%
Unknown Age	43,177	6.10%

For the Statewide Driver Age and Gender table, the **subtotal percentages** add up to 100%, and the individual percentages within the subgroups together add up to 100%.

Note that percentages are calculated based on the filters you have selected. For example, 7.95% of the drivers involved in fatal, personal injury and property damage crashes in New York State in 2018 were females 21-29 years old. Click the **Female** checkbox and observe that 22.22% of the female drivers involved in crashes statewide in 2018 were 21-29 years old.

Under the **Select Objects** tab, select **sections/items to print**.

If you want to print the whole report, you can skip this step.

Click **Print**.

Clicking **Print** on the previous screen will take you to a page showing all items from the report in one pdf file. **Please note, it may take a little time for the print routine to load.** The format of the page displaying the pdf file will differ depending on the browser you are using. Instructions when using **Chrome** or **Firefox** are provided below.

Save PDF

Chrome Browser

If you are using the Chrome browser, look for the menu bar at the top of the page. If the bar is not visible, move your cursor to the top of the page to show the bar. Click the **Download icon** to save the pdf file to your computer.

Firefox Browser

In Firefox, at the top of the page, click the **Download icon** to save the pdf file to your computer.

Print a Paper Copy

Chrome Browser

If the option **Expand Clipped Content** was selected, both the **Clipped** and **Expanded** versions of the report objects are included in the pdf. Click the **Expand icon** to see the full-page view. Click the **Restore icon** to return to the clipped view.

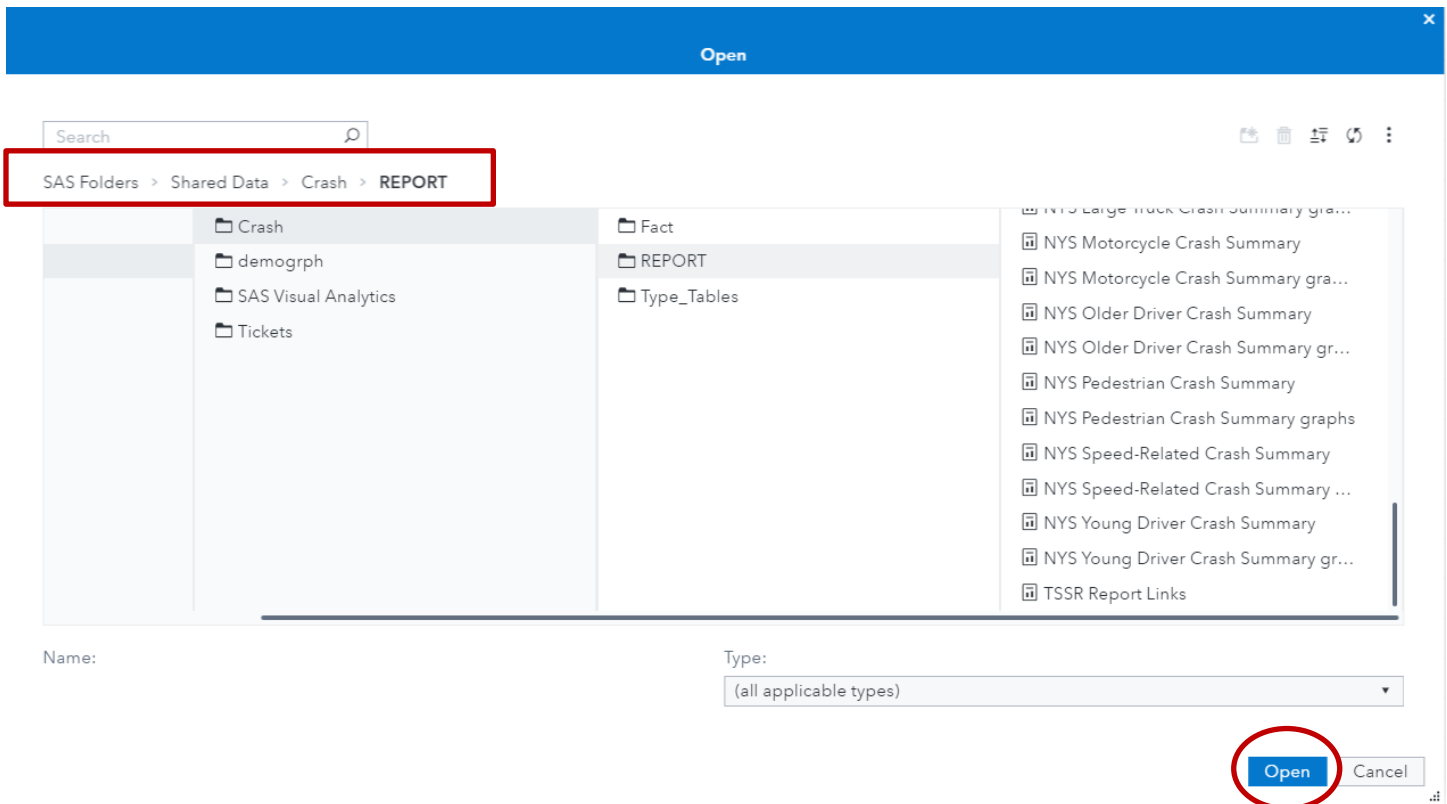

Appendix A – Additional Options

Report Options

On the right side of the navigation bar, click the **More Options icon** to select from a menu of report options.

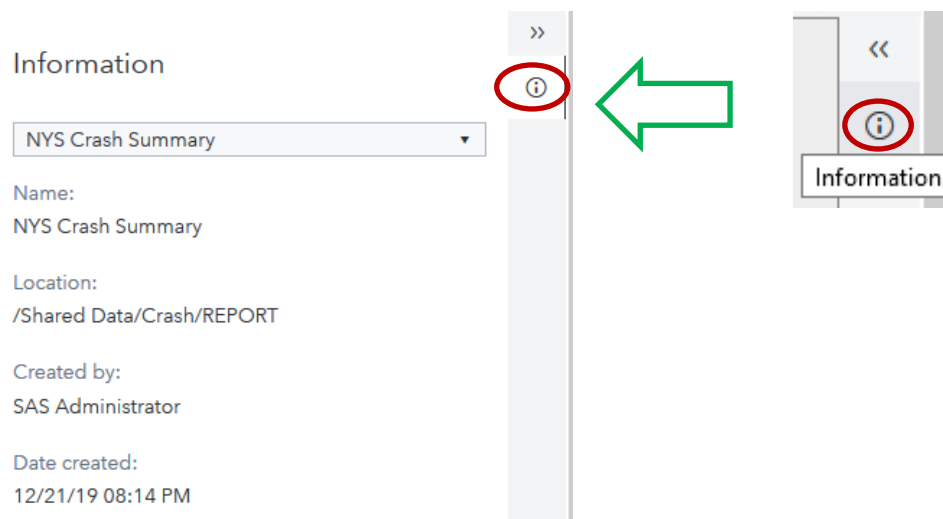

To open a Crash report, click **More Options > Open....** In the **Open dialog box**, navigate to **SAS Folders > Shared Data > Crash > REPORT**, select a report from the list, and click the **Open button**.

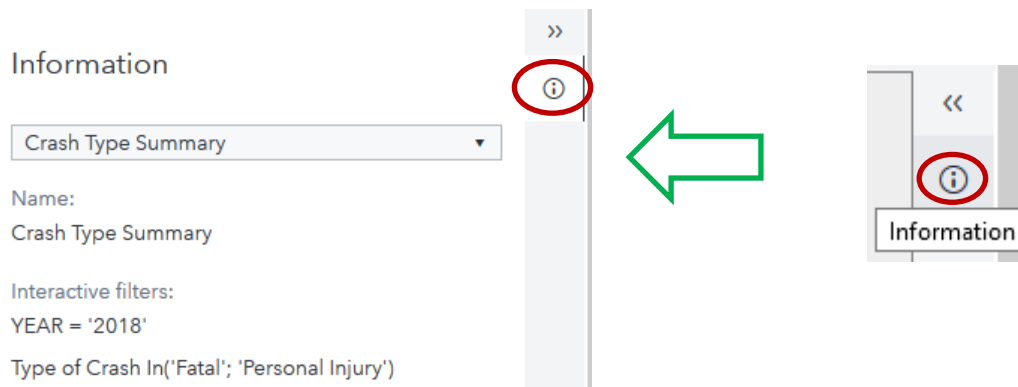

To open a Ticket report, navigate to **SAS Folders > Shared Data > Tickets**, select a report from the list, and click the **Open button**.

In the menu bar on the right side of the report, click the **Information icon** to show or hide details about the report.

Click a table or graph, then click the **Information icon** to show or hide basic information about the table or graph selected.

Click the **Filters icon**  on the right side of the navigation bar to show or hide prompted filters, for example, the **Report Type dropdown**. The icon will be inactive on reports that do not have prompted filters.

Filter with Charts

Click a single value in a chart legend, or Control-click multiple values, to **filter data results in charts**, where available.

Example: To find the numbers of male drivers under age 30 who were involved in fatal and personal injury crashes in New York State from 2014 to 2018, go to Statewide Crashes > Driver Age and Gender, click **charts** and follow these steps:

1. On the checklists, select years **2014-2018**; select **Fatal** and **Personal Injury**.

2. In the chart legend for **Drivers by Gender**, click **Male**.

3. In the chart legend for **Drivers by Age Group**, control-click **Under 16**, **16-20**, and **21-29**. View results in the **Drivers** chart.
