New York State Traffic Safety Statistical Repository (TSSR)

The NYS Traffic Safety Statistical Repository (TSSR) was developed by the University at Albany's Institute for Traffic Safety Management and Research (ITSMR) with funding from the NYS Governor's Traffic Safety Committee, to provide broader access to New York's traffic safety data.

The TSSR contains motor vehicle crash data and traffic safety ticket data. The crash data are obtained from the NYS Department of Motor Vehicles (DMV) Accident Information System (AIS). The ticket data are captured by two systems maintained by the NYS DMV: Traffic Safety Law Enforcement and Disposition (TSLED) and Administrative Adjudication (AA). Data for impaired driving tickets issued in NYC are captured by a separate system maintained by the NYPD and included in the TSSR. The TSSR provides public access to a rolling ten years of finalized data and preliminary data for the most recent year(s).

This guide provides instructions for navigating the TSSR system and interacting with the tables and graphs to view, understand and work with the data.

Access the TSSR

To access the TSSR, go to <https://www.itsmr.org/traffic-safety-statistical-repository/>. The main page, or **TSSR Report Links**, provides links to two main categories of reports. Click **Crash Reports** or **Ticket Reports** to go to a separate page containing a list of links to the available reports.

[Crash Reports](#)

[Ticket Reports](#)

The Accident Information System (AIS) maintained by the NYS Department of Motor Vehicles is the state's primary crash information system. The AIS captures a wide variety of data from the crash reports submitted by police agencies and motorists. Since the public does not have direct access to the AIS, the GTSC funded ITSMR to design and develop a traffic safety data repository that is publicly accessible via the Internet. As a result, ITSMR built a system known as the Traffic Safety Statistical Repository (TSSR) that captures crash and ticket data. ITSMR has also developed standardized reports and query tools to facilitate access to the data.

DATA SOURCES:

Crash Data: NYS Department of Motor Vehicles Accident Information System (AIS) data snapshot as of **02/15/2024**. Includes the finalized crash data for 2013-2022 and the preliminary data for 2023 and 2024. The preliminary data are subject to updates as new or additional information is reported to the DMV following the snapshot date.

Ticket Data: NYS Department of Motor Vehicles Traffic Safety Law Enforcement and Disposition (TSLED) and Administrative Adjudication (AA) systems data snapshot as of **January 2024**, including finalized data for 2013-2022 and preliminary data for 2023; and NYPD ticket system data snapshot as of **January 2023**, including finalized data for 2013-2022.

Vehicle Miles Traveled: NYS Department of Transportation

Population: U.S. Census Bureau

Licensed Drivers: NYS DMV Driver License File*

Motorcycle Registrations: NYS DMV Registration File

*NOTE: In response to the COVID-19 pandemic, Gov. Cuomo issued executive order 202.8 extending the active term of all DMV-issued photo ID documents (licenses, permits, non-driver IDs) that expired on or after 3/1/2020 until 2/26/2021. As a consequence, the License In Force counts for 2020 may include documents that technically expired on or after 3/1/2020 and had not yet been renewed as of 1/2/2021. Legally these documents were in force, although some of the documents may have never

Navigate to Reports

The **Navigation Bar** appears at the top of each Report page. Click the **report links** to return to the previous reports.

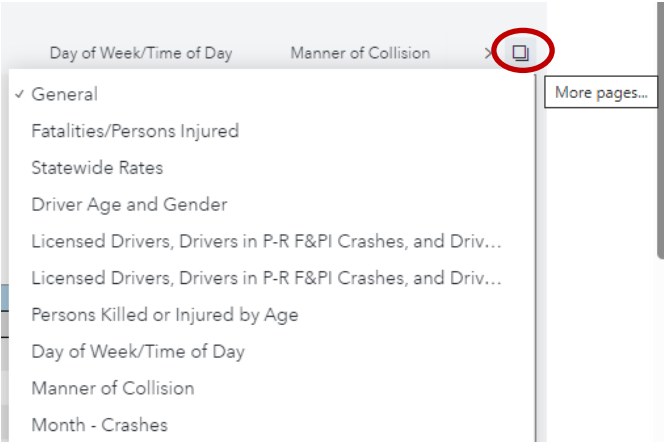

Click the **Opened reports icon** on the top right to navigate quickly to reports currently open; click the **“x”** to close a report.

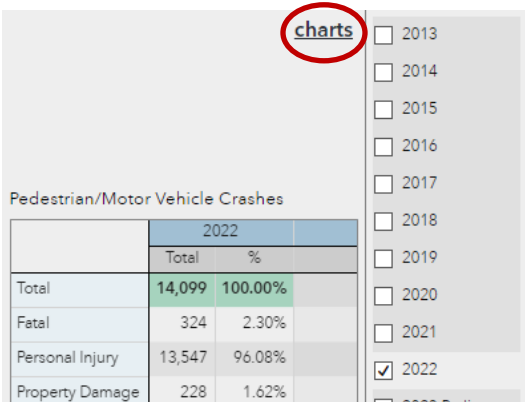

Tip: To save time once reports are opened, use the **Opened reports icon**; avoid using your browser's back button. Clicking the browser's back button and then returning to the TSSR requires extra time to re-load reports into memory.

Navigate to Report Sections

Every crash report and ticket report has multiple **sections**, or **pages**. For example, each statewide crash report opens by default to a page with **General** data displayed in tables. Click a different page or click the **More pages icon** to choose from a list of available pages. A complete list of current TSSR reports and associated sections can be found in the document entitled [TSSR Directory of Reports and Sections](#).

For the statewide crash and ticket reports, click the **charts** link to go to a section containing corresponding charts. Note that tables are available for most report sections. Charts are available for selected report sections.

Click **tables** to return to the corresponding tabular section.

Some sections – for example, **Driver Age and Gender** – contain a single table and multiple corresponding charts.

NYS Crash Summary - Driver Age and Gender by Crash Type

NYS Crash Summary - Driver Age and Gender

Filter Results for Tables and Graphs

Filter with the Report Type Dropdown

A screenshot of a dropdown menu for 'Report Type'. The menu is open, showing three options: 'All Reportable Crashes' (selected), 'Clear Filter', and 'Police-Reported Crashes'.

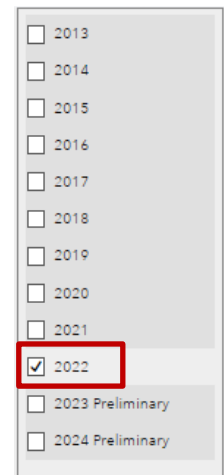

The **Report Type dropdown** list indicates the type of crash report from which the data in the tables or graphs is derived. The default setting for most TSSR crash reports, tables and charts is **All Reportable Crashes**, i.e., crash data received from both police crash reports and motorist crash reports. Select **Police-Reported Crashes** to limit the results to information received from police crash reports. Select **Clear Filter** to see

results for all reportable crashes. Note that some tables and graphs in the TSSR are limited to data from police-reported crashes, e.g., Severity of Crash in the General section; these are labeled **Police-Reported**. Clearing the filter will not affect the results for these tables or graphs. The reports that include only police-reported crash data, e.g., **Alcohol-Related Crash Summaries**, do not have a Report Type dropdown list.

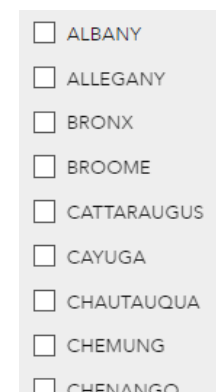

Filter with Checklists

Select one or multiple items in each checklist to **filter the data in tables and graphs**. Leaving every box unchecked in a checklist will return the same results as checking every box.

The default setting for the **Year checklist** in the tabular reports is the most recent final and complete year of data currently available. For the graphical reports, the default setting is the most recent five years of finalized data. Data for years that are not yet finalized are tagged "Preliminary" until the file is complete and the final clean-up has been conducted. Crash data are typically finalized by September of the following year. Exercise caution when using Preliminary data.

A screenshot of a 'Year checklist' with checkboxes for years from 2013 to 2024. The years 2013 through 2021 are unchecked. The year 2022 is checked and highlighted with a red box. The years 2023 and 2024 are labeled 'Preliminary' and are unchecked.

The County Crash and Ticket Summaries include a **County checklist** to show results for any or all of the counties in New York State. The default setting for the tabular reports is all 62 counties.

A screenshot of a 'County checklist' with checkboxes for various New York State counties. The visible counties are ALBANY, ALLEGANY, BRONX, BROOME, CATTARAUGUS, CAYUGA, CHAUTAUQUA, CHEMUNG, and CHENANGO. All checkboxes are currently unchecked.

Filter with Charts

Click a single value in a chart legend, or Control-click multiple values, to **filter data results in charts**, where available.

Example: To find the numbers of male drivers under age 30 who were involved in fatal and personal injury crashes in New York State from 2018 to 2022, go to Statewide Crashes > Driver Age and Gender, click **charts** and follow these steps:

1. On the checklists, select years **2018-2022**; select **Fatal** and **Personal Injury**.

2. In the chart legend for **Drivers by Gender**, click **Male**.

3. In the chart legend for **Drivers by Age Group**, control-click **Under 16**, **16-20**, and **21-29**. View results in the **Drivers** chart.

Property Damage (O)						

Click the 3 dots in the top right corner of a table or graph and select **Maximize view** to **Maximize**. Click the 3 dots and **Restore View** to **Exit maximized view**.

Use the scroll bar on the right of the table to scroll vertically. Use the scroll bar at the bottom of the table to scroll horizontally.

Save Image

Click the 3 dots in the top right corner of a table or graph and select **Export** and then **Image** to open or save/download a PNG image of the table or graph from the browser menu bar.

Export Data

To export data, click the 3 dots in the top right corner of a table or graph and select **Export** and then **Data...** Select desired options in the Export Data dialog box; then click **Export**. You can open or save the resulting file.

A screenshot of the 'Export Data' dialog box. It has a blue header with the title 'Export Data'. The 'Rows' section has a text box containing '1 - 1305'. The 'Columns' section has a 'Select all' checkbox checked, followed by a list of columns: 'Year', 'County', 'Severity Description 3', 'Total', and '%', all with checked checkboxes. The 'Options' section has a 'Formatted data' checkbox checked. The 'File type' section has a dropdown menu with 'Excel workbook (*.xlsx)' selected. At the bottom right, there are 'Export' and 'Cancel' buttons. The 'Export' button is circled in red.

Share Object

To share a link to an object, click the 3 dots in the top right corner of a table or graph and select **Share object...** Select desired options in the Generate Link dialog box; then click **Copy Link**.

A screenshot of the 'Copy Link' dialog box. It has a blue header with the title 'Copy Link'. The 'Item name' section shows 'Crash Type Summary'. Below it is a text box containing a long URL: 'https://viyaweb.itsmr.org/SASVisualAnalytics/?reportUri=%2Freports%2Freports%2Fcf4ca457-34b0-492e-995a-b02dee2e7f96§ionIndex=0&objectName=ve6507&sas-welcome=false'. Below the URL is a note: 'People who receive this link can open the report only if they have permission to read the report.' There is an expandable section labeled '> Options'. At the bottom right, there are 'Copy Link' and 'Cancel' buttons. The 'Copy Link' button is circled in red.

Sort Data

To sort any Total or Percent column in ascending or descending order, click the column heading. For example, the **up arrow icon** indicates that the totals have been sorted in ascending order and the **down arrow icon** indicates that the totals have been sorted in descending order.
